SELECTING a corporation as a trustee a prudent person should ascertain whether under the law It has ample powers and proper restrictions; whether its directors and officers are honest, prudent and capuble; whether its business is transacted under the direction of safe legal counsel; whether it invests its funds in the safest investments known to the courts and business men; whether it avoids the dangers of common banking and money lending; whether its trust funds are kept separate and apart from its general funds, and whether it is restricted from all speculation and confined strictly to a fiduciary business and according to law in the sole interests of its patrons. Consultation invited.

## THE INDIANA TRUST CO

OFFICE-23 S. Meridian.

A ST. PAUL SURPRISE

FALLING OFF IN NET EARNINGS NOTHING LIKE THE EXPECTATIONS.

Strength Feit Throughout the List on New York 'Change-Indianapolis Grain Held Firm.

At New York money on call was easy

at 1 per cent. Prime mercantile paper, 23/6/41/2 per cent. Sterling exchange was dull and easier, with actual business in bankers' bills at \$4.881/2 for demand and at \$4.871/4@4.871/2 for

sixty days; posted rates, \$4.88\2@4.90; commercial bills, \$4.861/4. Silver certificates, 64665c. Bar silver closed at 621/4c per ounce; at London, 285/8d. shares. The chief feature of interest of the speculative situation yesterday was the unexpectedly good showing made by St. Paul for the month of May, the net earnings being only \$73,053 less than for the corresponding month of 1893. It was thought that the May report would show a loss of over \$100,000, and when the figures were published the effect on the market was quite pronounced, and induced purchases, not alone of St. Paul and the other

grangers, but also of the list generally. Another favorable factor of the speculation was the very small withdrawal of gold for shipment to-day, being only \$500,and this, together with the reduction in the rates of sterling exchange to a point below the figures at which the exportation of gold is profitable, tended to impart a more confident tone to the trading on the built side of the market and stimulated covering on the part of the shorts. The London cables came in with reports of a good market abroad for American securities, and there was buying in most of the in-ternational stocks for the foreign account. The conditions seemed favorable to an upward movement in the railways, and some of the industrials came under the rule. Other stocks of this group were, howvalues. Sugar was notably strong on brisk baying, the bulk of the purchases being credited to a heavy operator who and covered his shorts and taken the other side of the market. Washington buying orders were also on the board, and a report was in circulation to the effect that the sugar schedule was safe. The shares rose 3% per cent. to 101%, and closed within 4 of the highest point touched. On the improvement in its business St. Paul sold 11/2, and retained the improvement to the end. The other grangers were strong in sympathy with the leader. Chicago Gas was sold down 15 during the morning

on conflicting reports from Chicago as involved, but when it became known that an agreement had been reached by which the differences are to be arranged and a egal settlement of the legal points at issue arrived at the stock recovered the entire loss, reacting % at the close. The market swung into the afternoon strong and moderately active, the improving tendeacy continuing up to the close, the last rices being made at an advance of 1402 on Tuesday's closing figures. Tae railway and miscellaneous bond

market was strong all day, the leading changes being: Advances: Cincinnati, Indianapolis, St. Louis & Chicago fours, 214; Chesapake & Ohio four and a halfs, Louisville & New Albany consols, 1 per cent. Declines: Chesapeake & Ohio, R. A. division seconds, Louisville & Nashville, N. & D. division firsts and Indianapolis, Decatur & Springfield firsts trust receipts, 2; and St. Paul gold sevens, 1

Government bonds were steady. State bonds were inactive. The following table, prepared by James E. Berry, Room 16, Board of Trade, shows the range of quotations: Open- High- Low- Clos-

LOCAL GRAIN AND PRODUCE.

Trade Exceedingly Quiet in Most Lines, with Few Changes. It's seldom that trade on the wholesale streets is as quiet as this week. Dry-goods

houses are doing very little, and concessions to sell good bills cut no figure in increasing sales beyond actual requirements. Hardware men are doing more than last month, but when compared with the June trade of years past the exhibit is very unsatisfactory. The flour market is less active. The Acme Milling Company has cut down one of its mills and the other mills are not pushing matters in the least. On Commission row a good deal is doing. Receipts of fruits and vegetables are large and prices easy, and this results in a good demand. Seldom do new potatoes, cabbages, onions and other vegetables sell as low in June as this year. Tomatoes are still scarce and prices firm. The pourtry market is active and receipts light. The egg market is easier, a good. deal of poor stock coming in. The local grain market was hardly as active yesterday as on Monday and Tuesday; still receipts are readily taken at the following range of prices on track: Wheat-No. 2 red, 54%c; No. 3 red, 52c. Corn-No. 1 white, 44%c; No. 2 white, 44%c; No. 3 white, 44½c for one color, 44c for grade; No. 4 white, 41c; No. 2 white mixed, 42½c; No. 3 white mixed, 43½c; No. 4 white mixed, 42c; No. 2 yellow, 43c; No. 3 yellow,

43c; No. 4 yellow, 40c; No. 2 mixed, 42c; No. 3 mixed, 42c; No. 4 mixed, 39c; ear corn, 43c. Oats-No. 2 white, 48½c; No. 3 white, 47c; No. 2 mixed, 47c; No. 3 mixed, 46c; rejected,

Rye-No. 2, 52e for ear lots; 45c for wagon Bran, \$11.50. Hay-Choice timothy, \$11.50; No. 1, \$11; No. 2, \$9.50; No. 1 prairie, \$6.50; mixed, \$8; clover, \$7@7.50 per ton.

Poultry and Other Produce. (Prices Paid by Shippers.) Capital, - \$1,000,000 Poultry-Hens, 6c per lo; spring chick-ens, 12c; turkeys, toms, 3c per lb; hens, 5c per lb; ducks, 5c per lb; geese, \$30 .60 per doz for choice. Eggs-Shippers paying 8c. Butter-Choice, 6@8c.

Honey-16@18c. Feathers-Prime geese, 30@32c per lb; mixed duck, 20c per ib. Beeswax-20c for yellow; 15c for dark. Wool-Medium unwashed, 13c; Cotswold and coarse combing, 11@12c; tub-washed. 16@22c; burry and unmerchantable, 5@10c

HIDES, TALLOW, ETC. Tallow-No. 1 tallow, 41/4c; No. 2 tallow, Grease-White, 41/2c; yellow, 31/2c; brown,

Bones-Dry, \$12@13 per ton. Hides-No. 1 G. S. hides, 31/4c; No. G. S. hides, 24c; No. 1 calf hides, 6c; No. 2 calf hides, 44c.

THE JOBBING TRADE.

(The quotations given below are the selling prices of wholesale dealers.) Canned Goods.

Peaches—Standard 3-pound, \$1.85@2; 3-pound seconds, \$1.50@1.65; 3-pound pie, \$1.15 @1.20; California standard, \$2.25@2.50; California seconds, \$1.85@2. Miscellaneous— Total sales of stocks amounted to 154,132 Blackberries, 2-pound, 90@95c; raspberries, 2-pound, \$1.10@1.20; pineapple, standard, 2-pound, \$1.25@1.35; choice, \$2@2.25; cove oysters, 1-pound full weight, 90@95c; light 70c; 2-pound full, \$1 80@1.90; light, \$1.10@ 1.20; string bcans, 85@95c; Lima beans, \$1.10 @1.30; peas, marrowfat, \$1.10@1.20; early June, \$1.25@1.50; lobsters, \$1.85@2: red cherries, \$1.20@1.25; strawberries, \$1.20@1.30; salmon (lbs), \$1.45@2.20; 3-pound tomatoes, \$1.05@1.10.

The Bean Crop.

Philadelphia Record. for consumption, over \$1,000,000 worth being imported some years, yet the prices range from \$1 to \$2 per bushel, and the yield is anywhere from twenty to forty bushels per acre, on very rich ground as much as sixty bushels per acre having been secured, though such yield is the exception. Pennsylvania produces but a small crop compared with what should be done, as her soil is well adapted for them. From one to two bushels of seed per acre should summer crop, and may be planted in June, the crop being ready to harvest in September, thus coming in for work after the corn crop has been planted. One of the drawbacks in growing beans has been the labor required. Formerly they were planted by hand, the stalks pulled up and great care exercised in curing and flailing the seed. At the present time there are bean planters, bean harvesters and bean threshers, which bring the cost down to a minimum, entailing no greater expense than is required for wheat, while the crop is grown and harvested in a much shorter time. The white navy or the white wonder variety is usually preferred, and the main point is to have the beans clean and free from imperfections, which is the most tedious operation connected with their growth, as they must frequently be hand-picked, a process which is performed during the winter, however, and y younger members of the family, or by giving employment to girls and boys at such light work. If the crop has been well cared for, this will not be as tedious or necessary as when the stalks and beans have been exposed to the weather. The greatest care necessary with the bean crop is in harvesting and storing. The stalks are cut when the pods turn yellow, and they should be cured sufficiently to avoid heating when stored under shelter. To guard against rains they may be stacked and covered, and then gotten under shelter as soon as possible, as rain discolors the beans. They may be flailed out on the bern floor or threshed. A bean thresher should be used, or they may be tramped with horses. Potash and lime are splendid fertilizers for the crop, and as beans are legumes, or nitrogen gatherers, the stalks will add more to the soil than they re-move, when turned to the soil as manure, and will be picked over and eaten by cattle to a certain extent. It would be better for an inexperienced person to try small crop this season, if only on haif an acre, in order to learn the details, as handling them one season only will be sufficient to enable growers to understand how to grow them in larger amounts during another year, while even the small crop will be found valuable for home consumption.

They "Sundayed" at Home.

Chicago Dispatch. The "merry party who picnicked Sunday" is out again this year. The sad parents who funeraled in town last week, however, are a trifle late.

Four days' racing at the Fair Grounds July 3 to 6. Go one day, the 4th, anyhow.

WHEAT STILL WEAK

WEATHER FINE AND MARKETS EASY ON BOTH SIDES THE WATER.

Trading in the Leading Cereal Not Heavy at Any Time - Corn Firm, Oats Weak and Pork Unchanged.

CHICAGO, June 27.-Weather fine, market weak and declining, was the news by cable from every foreign market to-day. The same was true of the weather and markets in this country. Wheat here started at 59c, a drop of 1/2c per bushel, and ruled heavy at the decline during the first hour of the session. The attempted tieup of Pullman cars was also given as a reason for the decline. The trading was light during the forenoon. N. B. Ream was said to be a buyer of wheat against puts he had secured, although he was openly a seller. Pardridge was a seller of moderate quantities. July opened at from 59c to 59%c, and touched 58%c during the fluctuations of the first hour. September started at from 61%c to 61%c, and worked gradually down to 61c. The heaviness with which the market opened increased and did not reach its fullest expression until after July had sold off to 58%@58%c and September to 60%@ 60%c. The price at the close for July was 59%c and for September 61%@61%c.

The corn market was firm after an early spell of weakness in sympathy with the decline in wheat. It was influenced also at the opening by the most favorable accounts regarding the growing plant everywhere. The succeeding firmness was due to the present good demand for the moderate quantity in sight. The trading was light and largely against privileges. July opened at 40%c, a decline of %c, the lowest price of the day, the closing price being 40%@

The oats crop is reported to have derived considerable benefit from the late rains and with a good amount of long stuff offered lower prices were scored. July started at 30½c, and advance of ½c, sold down to 38%c, and shortly before the close rallied

Pork and lard were neglected and changed very little in value. Ribs were traded in sparingly and to their disadvantage, closing at a decline of .05c for July, September remaining at yesterday's value. Freights are slow. Rates to Buffalo, 1%c for wheat and 1c for corn.

Receipts to-day were: Wheat, 23,000 bu; corn, 325,000 bu; oats, 270,000 bu. Shipments -- Wheat, 261,000 bu; corn, 160,000 bu; oats, 131,000 bu. Estimates for Thursday are: Wheat, 47 cars; corn, 20; oats, 134; hogs,

THE FLOUR OUTPUT. Trade Quiet, but the Mills Are Grinding at a Great Rate.

MINNEAPOLIS, Minn., June 27 .- The Northwestern Miller says: The Minneapo lis mills last week ground 201,345 barrels against 207,475 the week before, and 159,730 in 1893. Export shipments were 71,990 barrels against 65,770 the previous week. Trade was exceedingly quiet last week and has not improved so far this week. Export

trade is very dull, most foreigners not being

willing to pay the higher prices asked.

output and this week there will be an ap-The Superior-Duluth mills ground 37,888 barrels against 61,980 the preceding week, and 45,702 in 1893. Export shipments were 20,125 barrels against 25,827 the week before. The output for the current week is un-

At Milwaukee the output was 33,574 bar-rels against 40,000 the week before, and 66.-300 in 1893. Exports were 5,200 sacks. The flour trade still remains sluggish. At St. Louis flour was a little more active. Fluctuating wheat unsettled business and until a steadier tone sets in it is useless to look for much of an improve-ment in flour. The St. Louis mills made 45,300 barrels during the week, an increase of 5,400. In Michigan there was a little bet-

ments of feed. TRADE IN GENERAL.

Quotations at St. Louis, Philadelphia,

ter movement but a big decline in ship-

CELESTIAL PHOTOGRAPHY.

It Shows Thousands of Stars Where the Naked Eye Can See but One. Longman's Magazine.

Celestial objects can be photographed that will never be seen by the keenest eye, aided by the most powerful telescope that can be made.

The total number of stars visible to the naked eye in the whole heavens is only about 6,000; with our large telescopes this number becomes 50,000,000, while with the photographic eye it cannot be less than 160,000,000. Indeed, according to Dr. Roberts, it seems as if the photographic plate would become simply a mass of stars if sufficient exposure were allowed. This is well filustrated by photographs of portions of the milky way, "that broad and simple road whose dust is gold and pavement stars." They show that its hazy light, which teases the eye and eludes the skill of the artist, is simply the effect of myriads of stars be

yond our range of vision. It has baffled the most skillful draughtsmen to portray the masses of celestial haze we call nebulae, and show not only their size and shape but also their almost infinite graduation of light and shade. 'But the camera has proved itself an excellent nebula artist. It has almost doubled for us the known extent of the nebulous mass which may be taken to represent the starting point in the life history of worlds, when "the earth was without form and void, and darkness was upon the face of

The next step in the evolution of systems is illustrated by Dr. Roberts's wonderful photograph of the nebula in Andromeda, which revealed for the first time structures little dreamed of. As the whirling whitehot gas has cooled, it has contracted, and, the rate of rotation having consequently increased, two or three rings of 'uminous matter have been thrown off and left behind. In course of time the rings will doubtless further condense into bodies revolving round their central luminary. This stage is well illustrated by Roberts's photograph of the so-called spiral nebula in Canes Venatici. This picture shows that it does not consist of a regular spiral as was supposed, but of rings surrounding a nucleus, and that the rings are knotted here and there with brighter parts, as if the material was condensing to form stars.

To Secure Eggs at All Seasons. Dorothy, in Country Gentleman.

Mr. Beale's suggestion of a succession of pullets as the best means of securing winter eggs seems fairly reasonable, but it does not coincide with my experience of the past two years. In the little flock whose results were recorded in "A Baker's Dozen of Hens," the pullets were all from a single brood. The remainder were hens of the previous year's hatching, with two or three exceptions. From this little flock eggs were obtained throughout the year, with the exception of a single week in December. In the winter just past the flock was increased to twenty, more than half being fine pullets-a succession, the finest being saved from each brood, hatched from March to June:

Eggs were tolerably abundant up to Thanksgiving day, at least two pullets having begun laying at that time. Through December not an egg was laid. It will be remembered that the cold was severe, but the poultry houses seemed comfortable and the diet was varied. It was late in January before one of these pullets, aged from seven to ten months, offered a single winter egg in payment for her board and lodging. At that time a change was made in the evening feed of whole grain, from corn to wheat, as, in despair at finding any other cause, we concluded that the hens were "too fat to lay." Whether the wheat was needed to balance the ration, or whether, on quite other grounds, they were ready for business, I cannot say, but in a very few days a variety of eggs appeared, and the pullets of all ages took up their natural duties with great unanimity. At present, one hen having been eaten and one having lost her life by accident, we have had as high as fifteen eggs in a day from eighteen hens. But I doubt their being able to make up for lost time. The various factors that enter into the puzzling problem of egg production must be considered. Age, condition, temperature feed, personal care-all having something to do with it, and it seems needful that in all these respects the standard should be high in order to secure excellent results. But what we want, it seems to me, is to induce a regularity in laying that gives for each pullet or hen a good annual production, and not especially to bring the first clutch of eggs at a favorable time. Even if that were aimed at I fail to see

how it is to be insured. Rewarding Its Democracy.
